## Education

**Cebu Technological University**  
*Bachelor of Science in Information Technology*

**Expected July 2026**  
*Cebu City, Philippines*

## Experience

**Project Management | Lead Application Developer** **Oct 2024 – Present**  
*Cebu City, Philippines*  
*Cebu Technological University*

- Spearheaded the development of a **Barangay Management System** for San Roque (Ciudad), Cebu City.
- Automated 90% of manual barangay operations by integrating workflows into a centralized digital platform, boosting staff efficiency by 90%.
- Developed **Securado**, a real-time GPS and GSM tracking system capable of transmitting live coordinates to the cloud.
- Collaborated closely with stakeholders and the development team to deliver high-quality software aligned with user requirements.

**Technical Training Instructor (Student Role)** **Aug 2025 – Oct 2025**  
*Cebu City, Philippines*  
*Barangay San Roque (Ciudad)*

- Served as a student trainer for the **BarangayConnect Training Program**, empowering local residents through hands-on digital literacy training.
- Introduced and demonstrated key features of the barangay system, showcasing its benefits to non-technical users.
- Conducted practical training sessions to assess and improve participants' computer literacy and system usage skills.

## Projects

**Securado | Web, Mobile, IoT** **React, TypeScript, Django, PostgreSQL**  

- Developed web and mobile applications using React and React Native (Expo) integrated via a RESTful Django backend
- Built a GPS and GSM-enabled tracking device with ESP32 for real-time geolocation.
- Implemented modular solar charging and cloud-based telemetry for continuous operation.

**Barangay San Roque (Ciudad) | Web, Mobile** **React, TypeScript, Django, PostgreSQL**  

- Developed a cross-platform barangay management system with automated Know Your Customer (KYC) verification and assessment for resident registration in barangay San Roque (Ciudad), Cebu City.
- Synchronized dual databases to ensure consistent real-time data access.
- Set up CI/CD pipelines with GitHub Actions for integration testing and deployed via Render.

## Technical Skills

**Languages:** Python, Java, JavaScript (TypeScript), SQL, NoSQL, HTML, CSS

**Frameworks:** React, Django, Node.js, Flask, FastAPI, TailwindCSS

**Databases:** PostgreSQL, MySQL, Supabase, MongoDB

**Developer Tools:** Git, GitHub, Postman, VS Code
