

PAOLO ARANETA

(+63) 926-2355-926 | paoloaraneta008@gmail.com | linkedin.com/in/paoloaraneta | github.com/Aytsuu

Education

Cebu Technological University

Bachelor of Science in Information Technology

August 2022 - July 2026

Cebu City, Philippines

Technical Skills

Languages: Python, C#, Javascript (Typescript), PostgreSQL

Frameworks: RESTful, FastAPI, Django, Flask, .NET, React, Node.js, Astro

Tools: Git, Github, Docker, PostgreSQL, Redis, Codex, Cursor, Claude Code, Ollama, OpenRouter

Cloud & DevOps: Cloudflare, Supabase, Github Actions, Dockerized Deployments, CI/CD Pipelines

LLM Ingrated Workflows: LangChain, Langfuse, MCP Servers, Orchestration, Retrieval-Augmented Generation (RAG), Prompt Engineering, Context Engineering, Harness Engineering

Experience

Freelance Software Developer

Self Employed

June 2026 – Present

Cebu City, Philippines

- Develop custom business software that centralizes small-business operations into structured, automated workflows.
- Build modules for sales order tracking, admin dashboards, customer records, inquiries, business applications, content management, and product management.

Software Engineer Intern

Dinnox IT Solutions

Feb 2026 – June 2026

Cebu City, Philippines

- Led the development of a client-based website, implemented a structured monolithic architecture, and designed user workflows.
- Fixed a backend bug that heavily affected the development of interns and senior developers.
- Increased team productivity by introducing automation tools, such as leveraging agentic engineering in their workflows.

Technical Trainer

Barangay San Roque (Ciudad)

Aug 2025 – Oct 2025

Cebu City, Philippines

- Served as a trainer for the BarangayConnect Training Program, empowering 50+ local government workers through hands-on digital literacy training.
- Introduced and demonstrated key features of the barangay system, showcasing its benefits to non-technical residents and staffs.
- Conducted practical training sessions to assess and improve participants' computer literacy and system usage skills.

Client Projects

Meatshop and Poultry Business | *Astro, Cloudflare, Supabase, Redis, Github Actions*

<https://jehmarp.paoloaraneta.dev>

- Delivered a production sales and order-management platform for a local meatshop and poultry business, centralizing previously fragmented customer, product, order, payment, invoice, and reseller records into auditable end-to-end workflows.
- Built role-based admin and business-agent dashboards for order fulfillment, customer management, sales reporting, agent commissions earnings, and operational content—reducing duplicate data entry and making transactions traceable from order creation through payment.
- Established automated CI/CD pipelines to manage sequential testing and deployments from staging to production, as well as maintenance controls.

Thesis and Hackathon Projects

Barangay Management System | *React, Django, Docker*

- Developed a web and mobile platform that streamlines barangay operations through a centralized system, automating manual record keeping such as resident/non-resident profiling, incident reporting, blotter, request and issuance of documents, financial budgeting, events, and waste management.
- Key implementations include automated Know Your Customer (KYC) verification and assessment for resident and non-resident (business owners) registration, dynamic public facing page content via admin controls, role-based access with different dashboard views, as well as CI/CD pipelines for developer operations.

Orca | *Python, Astro, React, Redis, Supabase, Docker*

- Developed an AI-powered solution that turns real-time conversations into structured project plans so teams never loses sight of their project's finish line.
- Contributed to the development of this project's Minimum Viable Product within 6 days as Full Stack.

Hyperlocal Circular Economy Platform | *React, FastAPI, Supabase, Docker*

- Developed an application to divert food wastes from landfill, contributing to environmental wellness while fostering community resilience.
- Integrated an AI inference automation for food waste posting via images using gemini cloud LLM models.

Hackathon & Ideathon Competitions

Southeast Asia Innovation Competition

Participant

- Proposed a wellness-centric workspace planning platform that transforms room photos into purchase-ready layouts using instant AI simulation, clutter detection, and localized inventory tracking.
- Designed neurodivergent-aware style templates (color psychology) and budget-friendly DIY alternatives using recyclable materials to make workspace design accessible to students.

Reply AI Agent Challenge 2026 | *Python, LangChain, OpenRouter, Langfuse, LightGBM, XGBoost*

Rank 64 / 1,920 Teams

- Built a multi-agent AI risk-classification system using a hybrid ML and LLM pipeline to analyze event, mobility, and persona data, flag high-risk cases, and validate submissions with traceable agent runs.

OLTEK Paper to Data Hackathon | *FastAPI, PaddleOCR, Ollama, Next.js, PostgreSQL, Docker*

Top 10 Finalist

- Built a document intelligence platform that transformed contracts and scanned logistics paperwork into structured datasets and export-ready Excel reports through OCR, LLM extraction, validation, and a real-time web interface.

USAII Global AI Hackathon 2026 | *FastAPI, Astro, React, Supabase, PostgreSQL, Redis*

Finalist

- Built a human-in-the-loop AI planning workspace that used multi-stage agents, context retrieval, and proposal validation to turn team chats and project artifacts into structured execution plans.

ASEAN AI Hackathon 2026

Participant

- Proposed a multi-role AI public transport platform that helps commuters choose optimal loading zones using live telemetry, demand signals, confidence scoring, and corridor-level transit analytics.

IBM Dev Day: Bob Edition Hackathon 2026 | *FastAPI, React, TypeScript, watsonx.ai, pandas, Polars*

Participant

- Built a multi-agent ICU deterioration monitoring system that analyzes patient vitals, cross-signal conflicts, and time-sensitive risks to generate risk scores and SBAR briefs for clinicians.
